About Me

I'm a passionate Software Developer with over a year of hands-on experience crafting dynamic, user-friendly web and mobile applications. My journey in tech has been fueled by curiosity and a love for problem-solving, leading me to specialize in React, React Native, Django, Python, JavaScript, and PostgreSQL.

Whether I'm building a scalable platform or streamlining a complex process, I thrive on turning ideas into impactful solutions. Beyond the code, I enjoy collaborating with teams to bring projects to life and continuously exploring new technologies to stay ahead in this ever-evolving field.

I'm excited to bring my creativity, adaptability, and technical expertise to a team that values innovation and growth.

Experience

QTO House Sep 2024-Present

Full Stack Developer

Successfully developed an attendance portal and the company's official website, demonstrating expertise in creating efficient, user-friendly interfaces to support organizational operations.

Pukhtoon Solutions Hub Aug-2024

Full Stack Developer

- Led the development of the company's official website and an attendance management system using React, JavaScript, and Django.
- Focused on creating user-friendly interfaces and optimizing system performance, contributing to the efficiency of internal workflows and client-facing platforms.
- Engaged in full-stack development, including both frontend and backend tasks, to deliver robust and scalable solutions.

Projects

QTO House Official Website (Company Project)

Developed the company's official website using Django, React, and PostgreSQL.

QTO House Attendance Portal (Company Project)

Created an attendance management portal leveraging Django, React, and PostgreSQL for efficient employee tracking.

GeoGuard Geofencing Web Application (Final Year Project)

Developed a geofencing web application using Django, React, and PostgreSQL, integrating map functionalities to monitor user locations and enforce geofence rules.

PSH Official Website & Attendance Management System (Company Project)

Developed the official company website and an attendance management system using React, JavaScript, and Django, enhancing the company's online presence and streamlining employee attendance tracking.
